### **DETAILED ACTION**

#### Information Disclosure Statement

The IDS filed 4/27/2004 has been considered and placed of record. An initialed copy is attached herewith.

## Specification

The disclosure should be carefully reviewed to ensure that any and all grammatical, idiomatic, and spelling or other minor errors are corrected. For example, claims 17 and 18 call for a "droop sharing control" which sounded odd.

## Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 2 and 9-26 are rejected under 35 U.S.C. 102(b) as being anticipated by one of Kubo (US 6,297,616) and Kutkut (US 6,664,762). Both references disclose a battery charger having, *inter alia*, a plurality of batteries being charged through a high frequency transformer. A controller regulates power delivered to each of the battery module. Each battery module has its own rectifier and inverter.

Art Unit: 2838

## Allowable Subject Matter

Claims 3-8 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Claims 27 and 28 are allowed.
